### Process Instrumentation and Piping

#### Ball Valve Module Advantages

Ball valves act as primary and secondary isolation valves in process interface assemblies.

#### Needle Valve Module Advantages

Needle valves act as primary and secondary isolation valves in process monoflanges and as vent valves in monoflange and process interface assemblies.

**Typical Product Characteristics:**

The list below are examples of product options which do not affect the pressure-temperature ratings shown in the Summary Table. All of the following options are within the scope of this registration:

- Lockable Lever Handles (for block valves)
- Non-lockable Lever Handles (for block valves)
- Antitamper bleed valve
- Bar handle (for bleed valve)
- Injection and Sampling probes
